

ALUMERO

SOLAR.PRO.TOOL

FAST AND SAVE CALCULATION FOR SOLAR PROJECTS.

ADVANTAGES OF THE SOLAR.PRO.TOOL

ALUMERO YOUR SYSTEM SUPPLIER

As a supplier for systems Alumero offers you mounting solutions for PV modules on any style and type of roof.

PRODUCT RANGE

With our wide product range of mounting components we plan and deliver your individual solution for plants mounted on roof.

SPECIALISTS FOR SYSTEM AND SPECIAL SOLUTIONS

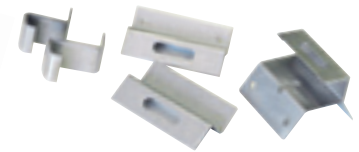

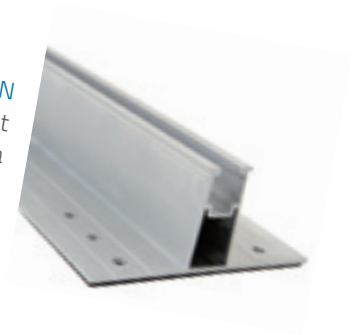

As specialist with system and special solutions for the installation of solar modules we offer comprehensive customer service for large projects.

PLANNING AND CONSULTATION

Beginning from objective planning and consultation up front, the low-cost and automated fabrication, to all required project documents, including a specific structural analysis for your project.

SHORT DELIVERY TIMES

We guarantee flexibility and a quick response time as well as shortest delivery times. Our components are permanently on stock and have just be picked for your project.

PROJECT PLANNING IN 8 STEPS

+ FAST
+ EFFECTIVE
+ UNERRING

With our new planning software – the Alumero Solar.Pro.Tool the planning and static calculation of the mounting construction become a breeze for you.

- 1 Master data
- 2 Roof dates
- 3 Interfering areas
- 4 PV-modules
- 5 Engineering design
- 6 CAD-plan
- 7 Statics
- 8 Required material

WHAT IS ALUMERO SOLAR.PRO.TOOL

The Alumero Solar.Pro.Tool is a software for a simple registration and fast planning of solar projects. After collecting the project data you will get a module plan with simulation of the shadowing, a workable CAD engineering plan, a list of the required material and a project report automatically. The results are based on the Alumero mounting system which you have chosen and on the therewith connected static calculations according to the EN norms.

YOUR BIG ADVANTAGE

- + Fast and easy data collection and project planning
- + Static calculation according to EN norms for each project
- + Consideration of shadow
- + Centralized project management
- + Secured planning
- + Save resources and minimize mistakes
- + Face- and mounting plan for each project
- + Individual planning and material list as output
